PROFESSIONAL SUMMARY

Data Analyst with 1 year of experience in SQL, Excel, Python, and Tableau, with a growing passion for Machine Learning and AI. Skilled in data preprocessing, visualization, and building models to uncover trends and drive data-driven decisions. Enthusiastic about leveraging AI to optimize faster workflow and business intelligence. Eager to contribute analytical expertise to any Technology industry and its mission of harnessing AI for innovative solutions.

EXPERIENCE

Work Experience/Projects (Self-Taught)

Intern | Huduma Kenya

5th/Sep - 5th/Dec (2022)

- Assisted in data entry, processing and report generation, ensuring accuracy and efficiency.
- Used Excel for organizing citizen service data and generating performance reports.
- Improved data handling and record management processes, reducing manual workload by 80%.
- Gained exposure to government service operations and digital transformation initiatives.

Data Analyst (Self-Taught) | Freelance & Personal Projects

(Jan 2024 – Present)

- Analyzed large datasets using SQL, Python and Excel, uncovering trends and insights from real-world data.
- Built interactive Tableau dashboards to visualize key metrics, improving data-driven decision-making.
- Developed Machine learning model to predict employee attrition, achieving 85% accuracy.
- Developed a Temperature Change forecasting model using Prophet module, analyzing climate trends and predicting future temperature variations.
- Automated data cleaning and preprocessing pipelines, reducing data preparation time by 60%.

Machine Learning Projects

(Jan 2024 – Present)

Employee Attrition Prediction Model (*Personal Project*)

- Preprocessed HR data using Pandas & NumPy, handling missing values and categorical encoding
- Trained Logistic Regression & Random Forest models, achieving 85% accuracy in predicting employee Attrition
- Visualized insights with Tableau dashboards, helping HR teams make data-driven decisions

Temperature change Forecasting with Prophet (*Personal Project*)

- Collected historical temperature data and applied time-series forecasting with Prophet
 - Predicted future temperature trends with high accuracy, showcasing expertise in climate data analysis
 - Visualized temperature trends using Matplotlib & Seaborn, providing actionable insights
-

SKILLS

[Technical Skills]

- ⇒ **Programming:** Python (Pandas, NumPy, Scikit-Learn), SQL
- ⇒ **Machine Learning:** Logistic Regression, Random Forest, Prophet
- ⇒ **Data Visualization:** Tableau, Matplotlib, Seaborn, Plotly.
- ⇒ **Data Manipulation:** SQL, Excel (Pivot Tables, VLOOKUP, Power Query).
- ⇒ **Big Data:** Jupyter Notebooks, Google Colab
- ⇒ **Time Series Forecasting:** prophet, ARIMA, LSTM
- ⇒ **Statistical Analysis:** Hypothesis Testing, A/B Testing
- ⇒ **Data Cleaning & Processing:** Feature Engineering, Handling Missing Data

[Soft Skills]

- ⇒ **Problem-Solving:** Breaking down complex data problems efficiently
- ⇒ **Analytical Thinking:** Translating raw data into actionable insights
- ⇒ **Attention to Detail:** Ensuring data accuracy and quality
- ⇒ **Communication:** Presenting data-driven findings to stakeholders

EDUCATION

Bachelor's Degree in Information Technology (Expected Completion: **[July/2026]**)
▪ **Jomo Kenyatta University of Agriculture and Technology (JKUAT)**

Diploma in Information Technology (2022 – 2023)
▪ **Jomo Kenyatta University of Agriculture and Technology (JKUAT)**
Attained a Credit

Kenya Certificate of Secondary Education (2016 – 2019)
▪ **St. Thomas Aquinas Boys Secondary school**
Attained a Mean Grade C Minus

CERTIFICATIONS

- **[Cisco Networking Academy]**, [Data Analytics] - [2024]
- **[Alexander Freberg]**, [Data Analytics Bootcamp] - [2024]
- **[Certification]**, [Diploma Information Technology] - [2023]

AWARDS & DIGITAL BADGE

- Machine learning course/ AI (IBM skill builds) (2025 – Current)
- Introduction to Data Science (Cisco Networking Academy) (2025 – Current)
- Data Analytics Essentials (Cisco Networking Academy) 2024
